

1.

Supporting research and the production of candidate COVID-19 vaccines

Making our vaccine **adjuvant technology** available to scientists and organisations working on candidate vaccines

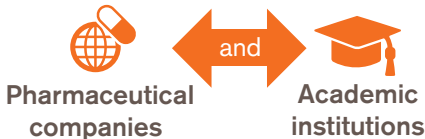

2.

Screening and research into **new medicines**

Joining the **COVID-19 Therapeutics Accelerator:**

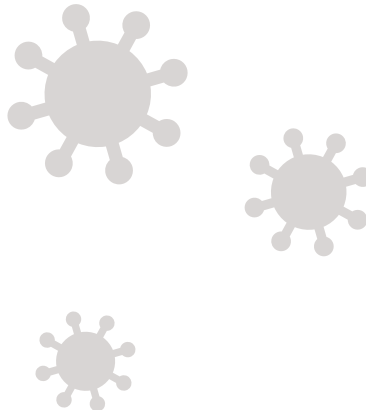

Coordinated research programs between

Making **compounds** from our libraries available for screening for activity against **COVID-19**

Evaluating our marketed pharmaceutical **products** and **medicines** in development to determine if they can be used **beyond** their current indications

Evaluating options to make our specialised **R&D laboratory space available** to help in the research and testing of COVID-19

3.

Helping **frontline health workers** and offering expertise

Donating **\$10 million**

to The COVID-19 Solidarity Response Fund, created by the UN Foundation and WHO to support the prevention, detection and management of the pandemic:

Enabling the distribution of essential supplies such as **personal protective equipment (PPE)** to frontline health workers

Donating **surplus reagents** to support **diagnostic testing** and preparing to do the same for surplus PPE

Establishing **volunteering** processes for employees with medical expertise to provide support to frontline health workers

Using our **salesforce personnel** to help with **delivery** of PPE and testing equipment

Using our specialists, such as procurement leaders, to work with national governments on developing **supply chains**

4.

Taking action to **deliver high-demand** consumer healthcare products

**Prioritising actions** in our supply chain to deliver more products that are in **high demand** due to COVID-19 (Panadol, multi-vitamins and dietary supplements)
