

A guide to cleanse your new partial,
as well as helping to **strengthen** and **protect**
your natural teeth to maintain a **healthy** mouth

STAND UP TO FURTHER TOOTH LOSS

Putting your best self forward

Your choice to get a partial denture fitted is the first step to putting your best self forward, and living life to its full potential.

As someone new to a partial, it's only natural to feel worried. From concerns around eating, to speaking, to further tooth loss... there's a lot to think about – all on top of the worry of keeping your partial clean.

DID YOU KNOW?

- With partial dentures there is an increase in odor-causing bacteria in the mouth
- Using a non-abrasive formula to clean partials may discourage odor-causing bacterial attachment
- If partial dentures are not kept clean they create a greater risk of weakening remaining teeth*

NOW IS THE TIME TO STAND UP TO FURTHER TOOTH LOSS

It doesn't have to feel overwhelming. It's easy to adopt a routine for properly cleaning your partial. An oral care routine can also help maintain your natural teeth and the health of your entire mouth.

*compared to people with fixed restorations

A simple 3-step range that helps strengthen and protect remaining natural teeth and cleanse partial dentures

Polident ProPartial is a new simple **3-step range** that targets the increased risks associated with wearing partials:

STEP
1

PURIFY

ProPartial Cleanser kills more than 99.9% of odor-causing bacteria* and helps remove tough stains† leaving your dentures with a fresh, clean feeling for up to 5 hours*. The foam cleanser removes odor-causing bacteria and plaque to keep your partial denture clean, fresh, and bright.

STEP
2

STRENGTHEN

ProPartial toothpaste helps to restore teeth to their natural whiteness by gently removing surface stains. It offers fluoride protection through remineralization and strengthens teeth against decay.

STEP
3

PROTECT

ProPartial Mouthwash cleans and freshens the whole mouth while protecting against tooth decay.

* When used as directed

† In lab tests

** With twice daily brushing

The Polident ProPartial range provides a specially developed range that can be easily integrated into your life to help reduce the risk of odor-causing bacteria building up on both your partial and natural teeth.

Stand up to further tooth loss by starting a routine for a fresh, clean, healthy mouth.
